

MINES AND MINING STOCKS = FINANCIAL AND COMMERCIAL

DALY-WEST CO.'S REPORT FOR JUNE

Dividend Is Earned in Face of Mill's Twelve-Day Close-Down.

MONTANA-TONO. MANAGER

JOHN A. KIRBY NAMED TO SUC-CEED D. B. GILLIES.

The Daly-West Mining company's financial report for the month of June has just been compiled and forwarded to the eastern directors. It shows re-ceipts for the sale of ore and concen-trates amounting to \$85,377.14, while dis-bursements, including the \$3.250 which is regularly set aside each month as a tax and fire insurance reserve, amounted to \$57,868.30. As these figures indicate that the dividend, which amounts to \$36,000 per month, was not earned by nearly \$8,500, the management makes a few words of explanation.

oby nearly \$8,500, the management makes a few words of explanation.

Owing to the fact that it requires practically all of a current month to gather in the accounts and make settlement, the statements which the company issues covers the receipts for the current month and the expenses for that of the preceding one. Therefore the showing, as it relates to June, may prove a little confusing. It must be the showing, as it relates to June, may prove a little confusing. It must be understood that during last month the mill was closed down for twelve days owing to the wrecking of the high-speed engine, so while the receipts were somewhat curtailed on that account, the disbursements, as stated, were for the full month of May. When the next statement is issued the order will be reversed. The receipts will cover the full month of July, barring the three days' lay-off for the Fourth, while the disbursements will cover the shorter month of June.

It can be stated on first-class authority, however, that while the month of

Ity, however, that while the month of June shows an apparent deficit of \$8,500, owing to the system of making up the statement, the dividend was, in reality, more than earned.

Yesterday an item taken from a Park City paper told of the mill being closed down. Manager Ernest Bamberger stated that it had been closed for just a few hours, and that there was not the least significance in the item. Such things frequently happen in the regular routine of running a plant of that character and magnitude.

MAJESTIC PRESIDENT ARRIVES.

W. B. Mucklow to Inspect Properties Here and Elsewhere.

After having been delayed by washouts and other causes for two or three days, William B. Mucklow, president of the Majestic company, reached the city yesterday morning accompanied by his bride. Last evening they took the southbound train for Beaver county, where they will spend a day or two at the Majestic mines and at the Newhouse properties. Friday morning they will return with Manager Lafayette Hanchett in Samuel Newhouse's private car and Saturday will leave for the northwest. After taking in the Portland exposition and after Mr. Mucklow has attended to business matters requiring his attention in that section, the couple will return east and sail ring his attention in that sec-couple will return east and sail be Aug. 9. cklow stated yesterday that he

Lower Mammoth. May Day. New York and Wabash were the only stocks dead in on the mining exchange yesterday. The total number of shares sold was 16,025, at during his absence in England.

Mr. Mucklow was much pleased with hat he had learned concerning operams at the properties of the Majestic mpany and he left for camp last night ling certain that he would find much ling certain that he woul

Local Director in Montgomery-Shoshone Returns From Camp.

shone Returns From Camp.

George A. Black, one of the directors of the Montgomery-Shoshone Mining company, returned from a ten days' trip through the Goldfield-Beatty-Rhyolite-Bullfrog region yesterday morning. When seen Mr. Black had not become rested up from his hot and arduous pilgrimage and felt little like talking.

He stated, however, that he was greatly surprised at the wealth of mineral that his brief run around the mines and prospects of the country brought under his observation. It was out of the question to expect any one to believe what the Bullfrog country amounted to without seeing it. He had been skeptical himself, but now that he had been on the ground and sized up conditions he was prepared to vouch for all that has been said and written about the country that had emanated from sane sources. Mr. Black did not attempt to go into details, as he was worn out with the trip.

BACK FROM CRESCENT.

Salt Lakers Spend Two Weeks in New District Examining Properties.

Judge John W. Burton, and Peter Porter, the well known mining expert, returned yesterday morning from a two weeks' round up of the Nippeno-Crescent region of Nevada. While they brought back several sample sacks full of ore and while both of them expressed themselves as being well pleased with what they had seen, neither had any information of a detailed character for publication.

They inspected the Double Standard, Lucky Dutchman and Tiger properties, among others, and expressed the con-viction that all of them would turn out well. well.

"I am confident that the towns of Nippeno and Crescent are going to grow and
prosper," said Judge Burton during the
afternoon. "There is a wonderfully enticing mineral region down that way, and
there is no question but that many fine
mines will be developed."

TONOPAH-GOLDFIELD SHIPMENT. Ton.-Mid.

Over 2,000 Tons of Ore Went Over Tonopah Railroad Last Week.

The ore shipments over the Tonopah railroad last week aggregated 1.95 tons, of which fifty tons came from Goldfield. The shipments are divided as follows: From Tonopah—Tonopah company, 1,980 tons; Tonopah Extension company, 280 tons; Monutan-Tonopah, 319 tons; Belmont, 140 tons; Midway, 64 tons; Tonopah Gold Mountain Mining company, 30 tons from Goldfield-New Western Ore Reduction company, 50 tons. From Lone Mountain-F. S. Lack, 12

NEW MONTANA-TONO. MANAGER.

W. H. Dickson returned from Tonopah yesterday morning after having participated in the meetings of the directors of the Montana-Tonopah company, and after having inspected that and other properties of the camp.

At Saturday's meeting of the directors the most important business transacted was that of selecting a successor to Donald B. Gillies, the general manager, who recently resigned in order that he might have more time to look after other enterprises in which he is largely interested.

After passing resolutions highly com-W. H. Dickson returned from Ton-

'Mr. Kirby holds an enviable position among expert mining men in this region where his ability as a mine manager is known by the entire fraternity. He will probably assume his duties about the first of the coming month.

Having been identified with the Montana-Tonopah company from its organization, and having many times inspected and made a study of the mine workings, he will assume charge not as a stranger, but as an official well versed in the mine's geological peculiarities

in the mine's geological peculiarities and structural formation.

U. S. MINING STRONG.

Stock's Advance Is Attributed to Large Holdings by Talent.

Large Holdings by Talent.

The strength of United States Mining shares has been largely due to the fact, which has recently become public property, that Sidney W. Winsilow has acquired for himself and his friends what is doubtless the largest concentrated holding of these shares, says the market letter of Hayden, Stone & Co. It will mean, doubtless, a more active interest on his part and that of his friends in the development of the United States Mining enterprise. If stockholders can be assured the co-operation of this element and that composed of Messrs, Evans, Foss and Ayer, certainly they have very little further to ask in the way of quality of their management.

That Mr. Winslow should have interested himself in this property as he has recently, is unquestionably a factor of great strength in the market position of the stock. People who have stayed with him in the United Shoe Machinery company are about as happy as any lot of investors we know, and we think that the confidence among prominent investors in United States Mining shares has been enormously increased by this development.

With its Sait Lake valley smelter

GREAT BEND TO SHIP.

Goldfield Property in Which Salt B. & Belcher Lake Is Interested Making Good.

Lake is interested Making Good.

Pay ore has been opened up on the Great Bend company's ground for some time, but the management's policy has been to prospect the big acreage with shallow shafts and trenching. As a result ore has been found on a half dozen or more separate ledges which traverse the ground. Now the management has decided to go to work and mine ore and convince the public that at least one shipper has been found, says the Goldfield News.

On the main shaft drifts are being extended north and south on a nice body of ore and at the seventy-five foot level an upraise is being made on two feet of high-grade ore. In a little tunnel twenty feet long a body of ore was entered a few days ago and there is no trouble in getting pannings that would indicate a value of at least \$1,000 a ton. It looks to be a bonanza discovery at present.

ise of beinz one of the best in the district.

The Advance Gold Mining company, capitalized for \$500,000, with \$500,000 shares of stock of the par value of \$1 a share, yesterday filed articles of incorporation in the office of the county clerk. The incorporators are H. W. Lawrence, Patrick Sheehan. Frank Godbe, George N. Lawyence, Charles W. Lawrence and J. W. Rooklidge. The company has three mining claims in the Chief mining district, Lincoln county, Nevada.

Articles of incorporation were filed yesterday in the office of the county elerk by the Ohio-Kentucky Mining company, which has an authorized capital stock of \$150,000, divided into 150,000 shares of the par value of \$1 per share. The incorporators of the company are James L. Hackett, Louisville, Ky.; G. M. Werk, Cincinnati, O.; E. L. Godbe, A. H. Godbe and C. S. Price, Salt Lake. The company has mining property near Pioche, Nev.

Nev.

Boise Statesman—A. J. Orem, who is interested in the Addle and Trade Dollar Extension companies at Silver, arrived in the city yesterday. He said they had been working both properties vigorously and hoped to make important developments soon. In the Trade Dollar Extension it was all dead work, but in the Addle they were mining ore which was

they realized it would require considerable expenditure to make paying mines of them.

Advices from Park City are to the effect that the air pipe line in the Ontario drain tunnel has now been laid to the light of the construction. In the expectation is that good headway will now be made in reaching what is believed to be the final obstruction. Just how far ahead this will be found can only be surmised, as the air beyond the 13,000-foot point has been too foul to admit of an investigation being made. As it is less than 2,500-feet to the mine workings from the 13,000-foot mark, it will not require long after the bad air is expelled to learn where the trouble is though it is not thought to be far from the mine end of the tunnel. Ed H. Meade, secretary of the Silver Shield Mining, company, who has been with D. H. Peery and the Montgomery Mountain Mining company, at Goldfield and Rhyolite for the past several months, came in from Nevada Monday evening to remain until about the first of the coming month. Mr. Meade arrived too late to head off the job that was put up on the Shield company at the delinquent sale, but he has gone to work and will endeavor to fix things up in a satisfactory manner. He reports everything moving nicely at the Montgomery mountain and says that one of the tunnels will reach the main ledge in the next sixty feet. Weather is hot at camp, but the mines are all working and by the time fall comes there will be all kinds of good news coming from the various districts.

ATTENDANCE ON 'CHANGE SMALL

Fluctuations in Prices Were Generally Trivial.

LEVEL IS SLIGHTLY LOWER

SOME TALK OF UNION PACIFIC DIVIDEND.

New York, July 18 .- A glance of the total sales of stockss for the day will make clear that the trivial fluctuations V in prices were owing to the fact that no important trading was done. The small attendance of brokers at the stock exchange showed more interest in the dismarket. A downward drift of a few eighths in an active stock was expect-ed by the report that the principal traders in the stock had left the floor to indulge in a shower bath.

The recovery in the stock was likely to follow the traders' return. Financial ensiderations of far-reaching conse

uence do not enter into discussion of uch a market, the bulk of the day's neagre business was done in the first our of the session when a few testing operations by traders were in evi-

the question of how far the increase had already been discounted in the price of the stock. There was nothing in the weekly crop bulletin to disturb the recent confidence in the condition of the grain crops. Efforts to market small amounts of some of the dormant industrial stocks resulted in heavy declines before bids were encountered. small amounts of some of the dormant industrial stocks resulted in heavy de-clines before bids were encountered and this had a slightly disturbing in-

that a sale of a stock exchange seat had been effected at an advance of sev-eralw thousand dollars over the pre-Bonds were heavy, total sales, par value, \$1,995,000

United States bonds were unchanged

Metal Markets. New York, July 18.—The London tin market was again higher, owing it was said to speculative developments with specifications at £143 75 6d and futures at £143 75 6d. Locally the market was quiet and in spite of the advance abroad showed a somewhat easier tendency with specific property. ing operations by traders were in evidence. These attempts demonstrated the lifeless condition of the market and left it to the semi-stagnation of the rest of the day. The gravitation of prices to a slightly lower level during the day was ascribable as much to inanitation as to any inactive cause. The Union Pacific dividend to be declared in the future was still much discussed, the continued belief being that the stock would be placed on a five per cent dividend basis.

Its effect, however, was modified by the question of how far the increase

Money, Silver, Etc.

fluence on sentiment. The recent added demand for six months' time money was extended to that market for loans of some of the shorter periods and loan bills were offered in the foreign exchange market with effect in keeping down the price of exchange.

Some effect was produced by reports of further sales of foundry pig iron and by the strong London market for copper. In spite of the low level of steel, commission business, it was reported that a sale of a stock exchange seat had been effected at an advance of severally thousand dellars over the results of the low level of steel, commission business, it was reported that a sale of a stock exchange seat had been effected at an advance of severally thousand dellars over the results of the low level of severally thousand dellars over the results of the low level of steel, commission business, it was reported that a sale of a stock exchange seat had been effected at an advance of severally thousand dellars over the results of the low level of steel, commission business, it was reported that a sale of a stock exchange seat had been effected at an advance of severally thousand dellars over the results of the source of the low level of steel, commission business, it was reported that a sale of a stock exchange seat had been effected at an advance of severally thousand dellars over the results of the source of the low level of steel, commission business, it was reported that a sale of a stock exchange seat had been effected at an advance of severally thousand dellars over the results of the source of the low level of steel, commission business in bankers bills at 4.8600/4.805 for demand and at 4.8650/4.805 for sixty developed the server of the server of the low level of the low leave, and the loans of t

GRAIN AND PROVISIONS.

anged Chlago, July 18.—Firmness in the wheat market developed soon after the opening. At the start a weak tone prevailed, ipital cuotations on September being down & to & at \$23,6325, news at hand being entirely of a bearish character. Weather conditions throughout the wheat growing sections of the United States were almost ideal for the new crop, no rain being reported except scattered showers in the Dakotas and Minnesota. The movement of new wheat in the southwest was again of large volume, aggregate arrivals today at Kansas City and St. Louis being 60,000 bushels, compared with 162,000 bushels a year ago. In addition prices for wheat at Liverpool showed considerable decline. However, after the first rush to sell was over shorts became active buyers and there was also

Wool Market.

Boston, July 18—Although the wool market is still quiet, it is believed that an active period is about to open. The lyarger manufacturers have not been heavy buyers, but enough of the smaller mills have been operating to make the aggregate of sales larger than for several weeks. In prices the market is notably strong. The continued firmness reported from the London sales is an important factor. Pulled wools are scarce. Territories have sold well, and are quoted:

[Idaho fine, 22@24; heavy fine, 19@21; fine medium, 26@24; medium, 28@27; low medium, 25@24; medium, 26@27; low medium, 27.

Wyoming fine, 22@23; heavy fine, 19@20; fine medium, 250.

Utah and Nevada fine, 22@23; heavy Utah and Nevada fine, 2223; heavy fine, 1829; fine medium, 2623; medium, 2627; low medium, 2628; medium, Montana fine choice, 25628; fine aver-age, 23624; fine medium choice, 25626; av-erage, 21622; staple, 28630; medium choice, 29630.

Butter and Eggs. New York, July 18.—Butter and eggs were unchanged.

You can buy ten-cent quality for 5 cents now that the duty on Cuban-grown tobacco has been reduced

Just ask for the "New Tariff"-in any good cigar store.

It will prove the best smoke your five cents ever bought.

The choicest selected leaf is thoroughly cured, fermented and blended till the essential fragrance and aroma has reached a rich maturity, and every trace of the original harsh bitterness has beeen removed. This is done for the "New Tariff" by new processes not even attempted in the manufacture of ordinary cigars.

Sold by all Cigar Dealers.
